Vorwort.

1. Die Tontafelarchive von Drehem und Djoha sind nicht durch fachkundig geleitete Ausgrabungen, sondern durch klandestines Suchen und planloses Aufstöbern erwerbsbegieriger Eingeborener ausgehoben worden, und das aufgefundene Inschriftenmaterial wurde im Antiquitätenhandel nach Europa und Amerika verkauft. Ein Teil desselben ging so in den Besitzstand der Staats- und Universitätsmuseen über, während ein anderer Teil von Privatpersonen erworben wurde.

Zuerst waren die Drehemtexte in den Handel gekommen. Bald kamen aber auch die Urkunden aus Djoha hinzu und wurden vielfach in wahlloser Vermischung mit den Drehemtafeln feilgeboten. Da die Antiquitätenhändler aber über deren Herkunft keinen zuverlässigen Bescheid geben konnten, ist man zur Unterscheidung der einzelnen Urkunden nach deren Zugehörigkeit einzig und allein auf innere Kriterien angewiesen. Diese sind nun aber derart typisch ausgeprägt, dass man nur in den seltensten Fällen über die Herkunft einer Tafel in Zweifel sein kann. Wie es übrigens hinreichend feststeht, wie jedes Tontafelarchiv der ältesten Zeit sein ganz charakteristisches Gepräge hatte. Als unterscheidende Merkmale kommen hauptsächlich in Betracht: Sachinhalt, paläographische Eigenarten, Wortschatz, Landbeschreibung, Siegelabrollen, Eigennamen, Ortsnamen, Monatsnamen, Jahresdatierungen. Nach diesen Gesichtspunkten konnten wir auch die Geschäftsurkunden aus Drehem und Djoha der Berliner Staatsmuseen bis auf ganz wenige Exemplare mit der grössten Sicherheit gruppieren und dieselben nicht nur unter sich, sondern auch unter den Texten aus andern Fundorten, mit denen sie zum Teil vermischt katalogisiert sind, nach ihrem Herkunftsort unterscheiden. Demnach sind auch die Inventarbücher der Berliner Vorderasiatischen Abteilung zu berichtigen, die die Herkunft der einzelnen Tafeln wohl nur nach den Angaben der Antiquitätenhändler libelliert haben, die aber deren genauen Fundort nicht wissen und deshalb auch nicht angeben konnten.

2. Von den Drehem- und Djohainschriften sind schon manche staatliche Sammlungen veröffentlicht worden. Auch einzeln sind nicht wenige Tafeln derselben Herkunft in Zeitschriften, oder mit Tafeln anderer Gattung vermischt, bekannt gegeben worden, sei es in Autographie oder wenigstens in Transkription. Auf diese Weise sind schon viele Tausende von diesen Urkunden der Forschung zugänglich gemacht worden. Es mögen aber noch andere Tausende sein, die in Museen aufliegen oder sich in Privatbesitz befinden, und die noch keinen Bearbeiter gefunden haben. Leider haben sich auch manche Herausgeber nur mit einer Auswahl der ihnen zur Verfügung gestellten Texte begnügt. Und doch wäre es zu wünschen, dass die beiden Archive nach ihrem ganzen Bestand erschlossen würden. Erst dann wird ein abschliessendes Urteil über den Kulturwert derselben gefällt werden können. Wenn auch diese Tafeln im Geschäftsstil nach einer schematischen Textform geschrieben wurden, so darf doch die Bedeutung der einzelnen Urkunde nicht unterschätzt

werden. Wenn sie auch vereinzelt kein neues Moment offenbaren, so können sie trotzdem, in eine grössere Gruppe hineingestellt für die Gesamtsynthese wertvoll werden. Das Urteil darüber darf nicht dem jeweiligen Herausgeber überlassen bleiben, da das Urteil der spätern Wissenschaft, die ein ausgedehnteres Material zur Verfügung hat und die einzelnen Kulturfaktoren in einem erweiterten Blickfeld überschauen kann, ganz anders orientiert sein kann.

Aus diesen Erwägungen heraus haben wir uns entschlossen die Berliner Drehem- und Djohartexte in Autographie und mit systematischen Wörterindices zu veröffentlichen, denn sich, so Gott will, unmittelbar die Strassburger Texte anschliessen werden. Eigentlich war die Veröffentlichung der Berliner Texte schon für das Jahr 1925 vorgesehen worden. Es sei dem derzeitigen Leiter der Vorderasiatischen Abteilung der Staatsmuseen in Berlin, Dr. H. Ehelolf, der verbindlichste Dank ausgesprochen, dass er in wohlwollendster Weise deren Veröffentlichung in den „Orientalia" des Päpstlichen Bibelinstituts gestattet hat.

3. Schon in „Orientalia 8" hatten wir obiges Desideratum ausgesprochen, nämlich dass möglichst bald der ganze Textbestand zugänglich gemacht würde, hatten aber hinzugefügt, dass die Texte in der keilschriftlichen Originalfassung, nicht in der Transkription allein publiziert würden. Der Hauptgrund dazu war der Umstand, dass man bis dahin kein allgemein angenommenes Transkriptionssystem besass und jeder nach eigenem Gutdünken die homophonen Keilschriftzeichen akzentuierte. Dadurch war die sofortige Erfassung des Originaltextbildes bedeutend erschwert. Dieser Grund kann nun heute wegfallen da Thureau-Dangin seine „Homophones sumériens" herausgegeben hat. So könnte man sich heute in etwa mit dem transkribierten Text, der bei weitem weniger kostspielig für die Herstellung ist, begnügen. Dies um so mehr, weil schon so viele Texte in Autographie veröffentlicht wurden, dass das paläographische Moment nicht mehr in Betracht kommen kann. Es bleibt aber trotzdem noch ein anderer Übelstand bestehen, nämlich die falsche Lesung des Keilschriftzeichens. Viele dieser Texte sind von Anfängern oder von Assyriologen bearbeitet worden, die sich in der Keilschriftzeichenform dieser Periode weniger gut auskennen. So sind bei ihnen viele Deutungsfehler unterlaufen. So lesen wir z.B. noch in „Altorientalische Studien" (1929) mu en ^{d}Innina ba-**túg**, obschon die Autographie klar ba-**šù** hat, und der Bearbeiter nicht beachtet, dass in der „Urperiode" die drei Zeichen **šù**, **túg** und **ku** ganz scharf auseinandergehalten werden, was in der spätern Keilschrift freilich nicht mehr zutrifft. Es dauert nämlich sehr lange, bis man zur Erkenntnis kommt, dass die einzelnen Kulturperioden Mesopotamiens extremst für sich studiert werden müssen, da jede Periode ihre Eigenarten hat, nicht nur in staatlicher und wirtschaftlicher und religiöser Beziehung, sondern auch in Schrift und Sprache. Auch die sumerische Sprache schaut in ältester Zeit anders aus als in der Zeit der Syllabare und der zweisprachigen Texte. Ferner fragt man sich, was man mit dem transkribierten Text allein anfangen könnte in den Ausgaben von Langdon, Nies, Jean, Speleers, Margolis, Nesbit, Nakahara, Driver, Bedale, wenn sie nicht auch die Autographie hinzugefügt hätten.

4. Bei der Anordnung der Texte in vorliegender Sammlung war bei den

Drehemtexten in erster Linie der Inhalt ausschlaggebend. Innerhalb der Sachordnung wurde dann noch die chronologische Aufeinanderfolge berücksichtigt.

Bei den Djoḫatexten haben wir uns mit der chronologischen Anordnung begnügt. Die Inschriften von Djoḫa handeln nämlich über so verschiedenartige Dinge, dass es schwer fällt, dieselben in wenige übersichtliche Gruppen unterzubringen, um so mehr, weil auch die entsprechenden Unterschriften nicht so konsequent durchgeführt sind, wie bei den Drehemtexten.

Übrigens sind letztere mit geradezu klassischer Sorgfalt und Korrektheit in Kalligraphie und Satzbau geschrieben, während die Djoḫaurkunden vielfach eine nervösere Hast, graphische Sorglosigkeit und redaktionelle Nachlässigkeit bekunden.

Eine chronologische Anordnung ist bei unsern Texten deshalb möglich, weil sie in überwiegender Anzahl genau datiert sind nach Tag, Monat und Jahr. Auch in den Datierungen sind die Drehemtexte viel ausführlicher und präziser als die Djoḫadokumente.

5. Unter den Djoḫatexten gibt es eine doppelte Gruppe von Tafeln, die dem Entzifferer nicht geringe Schwierigkeiten bereiten, und die er vielfach nur mit verärgerter Stimmung in die Hand nimmt. Eine erste Gruppe bilden die *Auslöhnungslisten* von Boten, die mit mikroskopisch kleinen Zeichen beschrieben sind, so dass man darüber staunen muss, wie sie mit blossem Auge beschrieben werden konnten. Eine zweite Gruppe von Geschäftsurkunden ist zwar in gewöhnlicher Zeichengrösse beschrieben. Aber unmittelbar nach der Niederschrift wurden sie auf beiden Schriftseiten mit dem Siegel wiederholt überrollt, so dass von den einzelnen Zeichen, die dadurch platt gedrückt wurden, nur spärliche Keilreste sichtbar blieben, oder überhaupt gänzlich bis zur Unkenntlichkeit verdrückt wurden. Dabei hat die Siegellegende ihrerseits ebenfalls so sehr darunter gelitten, dass trotz der wiederholten Abrollung der Text des Siegels unlesbar blieb. Daher mussten wir so oft den Vermerk beifügen: Siegel undeutlich. Man kann sich keinen plausiblen Grund ausdenken, weshalb man so verfahren ist und auf diese Weise in vielen Tafeln Text und Siegellegende zusammen bis zur Unlesbarkeit entstellt hat.

6. Dass dann auch das *Siegelbild* mit zerstört wurde, ist ganz natürlich. Dort, wo das Siegelbild erhalten ist, in Drehem sowohl als auch in Djoḫa, stellt es fast ausnahmslos die bereits hinreichend bekannte Adorationsszene dar, wo ein Adorant an der Hand einer Vermittlungsgottheit der auf dem Throne sitzenden Hauptgottheit zugeführt wird. Wir konnten demnach auf eine jedesmalige Nachzeichnung dieser Siegelbilder verzichten. Tritt eine Abweichung von der allgemeinen Darstellungsart in Erscheinung, so ist das ausdrücklich vermerkt worden.

7. Soll noch besonders hervorgehoben werden, dass auch die hier veröffentlichten Texte *inhaltlich* sich den bereits bekannten Texten anschliessen. Sind jene von Drehem zum grössten Teil Einlieferungs- und Auslieferungsbescheinigungen von Opfervieh an die einzelnen Gottheiten des sumerischen Pantheons, so wird durch die Djoḫatexte das alte Umma als bedeutende Handelsstadt Südbabyloniens dokumentiert. Neben

dem Viehhandel und dem Getreidehandel waren es hauptsächlich Spezereien und Baumaterialien, die in Umma in ausgedehnten Grosshandelshäusern aufgestapelt waren. Ein reger Schiffsverkehr vermittelte die Zufuhr und den Export. Das entsprechende Beamten- und Arbeiterpersonal wurde nach genau festgelegten Arbeitstarifen ausgelöhnt, in kranken Tagen erhielten sie bestimmte Krankenrente ausbezahlt. Dazu kommen die Viehlieferungslisten, die Berichte über den Ertrag der Felder, Gärten und Palmenhaine, die Rechnungen über die Anfertigung von Arbeitszeug, Kleider, Gold- und Silberwaren, Bronzegeräten, Edelsteinen, Bauziegeln, Haus- und Schiffbauten, Kanalanlagen, Futterration für die Haustiere usw.

8. Die Urkunden sind ausnahmslos, trotz des grossen semitischen Einflusses, in *Sumerischer* Sprache verfasst, und weisen ausser den semitischen Eigennamen auch nicht die geringste Spur eines akkadischen Satzes oder Ausdruckes auf.

9. Es ist unsere Absicht nicht, dieser Textausgabe auch eine eingehende Erklärung der einzelnen Dokumente anzufügen, da wir der Ansicht sind, dass eine solche Erklärung erst nach Bekanntgabe des ganzen Archivs erfolgen kann. Wir haben aber darauf bestanden, in weit ausholenden *systematischen Wörterverzeichnissen* sämtliches massgebende Sach- und Sprachmaterial, das für eine spätere Synthese unerlässlich ist, übersichtlich zusammenzutragen.

10. Da unterdessen „Les Homophones Sumériens" von Thureau-Dangin erschienen ist, so glauben wir es der Disziplin schuldig zu sein, uns an dieses Transkriptionssystem, das einmal die so oft herbeigewünschte Uniformität bringen sollte, in peinlichster Genauigkeit zu halten. Wir können aber nicht umhin, unserm Bedauern Ausdruck zu geben, dass gerade für die ältern sumerischen Texte ganz empfindliche Lücken festgestellt werden müssen. Vergebens sucht man nach dem Lautwert des Doppelzeichens DUL-DU, das in den Djoharitexten so oft wiederkehrt. Auch gibt es keine neue Akzentuierung für die Zeichen REC. 144, 145, 147, 220, die in unsern Texten noch auseinandergehalten werden. Desgleichen für REC. 443 und lál+túg.

I. Klassierung der Urkunden.

A. Drehemurkunden.

Die 150 Urkunden, die wir dem Archiv von Drehem zuerkannt haben, können nach dem Stichwort, das die Art der Urkunde charakterisiert in folgende Gruppen aufgeteilt werden: ba-zi-, zi-ga-, ni-ku-, šu-ba-ti-, gab-ri-dub-, šà-bi-ta-Urkunden, und Vertragsurkunden.

1. ba-zi-Texte.

Zu dieser Gruppe gehören die Nummern 1-44 und 144. Das charakteristische Stichwort ist ba-zi, d. i. „wurde weggenommen" (= herausgabt). Stereotype Formel: ki N.-ta

ba-zi. Bei Nr. 13 und 14 fehlt wohl ba-zi, dürfte aber dem Zusammenhang nach zu ergänzen sein. Die Personen, durch die diese Operation vollzogen wird, sind folgende:

Ab-ba-šaₓ-ga: 4; 9; 11; 12; 14; 15; 17; 18; 19; 20; 21; 22; 23; 25; 26; 28; 29; 30; 31; 32; 33.
Na-šaₓ: 1; 2; 3; 5; 6; 7.
Šú-dingir-ra: 38; 39; 144.
Ur-azag-nun-na: 27; 41.
A-ḫu-ni: 37.
Ab-ba-kal-la: 43.
^{d}En-lil-lá: 24.
Lú ^{d}Nin-šubur: 40.
Lugal-amar-azag: 34.
Lugal-me-ne: 42.
Ur ^{d}Ba-ú: 8.
Name weggebrochen: 36.
Ìr-ra-dan (ohne ba-zi): 44.
En ^{d}Innina (ohne ba-zi): 13.
Besondere Konstruktion: a-ša-ta ba-zi: 10.

Nota: Keine hervorragende Magistratsperson beteiligt sich am ba-zi. Die bedeutendste Rolle spielt Ab-ba-šaₓ-ga, der auch sonst, besonders in den ni-ku-Texten, häufig anzutreffen ist. Doch steht sein Name immer ohne Titulatur, so dass es unklar bleibt, welche politische, religiöse oder volkswirtschaftliche Berufsarbeit ihm von Amtswegen übertragen war.

6) *Objekt* dieser ba-zi-Operation sind zum öftesten Tiere, es können aber auch Metallgegenstände sein: giš-banšur e-lam (37), ḫar kù-babbar (38 u. 39), urudu ḫa-bù-da (44) und šu-nir (144). Welche Tiere in Betracht kommen, kann man unten aus der Liste der Tiernamen ersehen. Sie werden als Opfergeschenke für bestimmte Gottheiten und heilige Gegenstände, für Kultorte, wie das é-dub-ba und é-uz-ga eingeliefert (mu-gub) oder für das é-mu gestiftet (šu-gíd). Die gewöhnliche Libellierung ist diese: Opfergabe, Gottheit, Stifter. Beispiel: 1 silá ^{d}En-ki mu-gub Ur ^{d}Šul-pa-è. Bisweilen kommt auch der Name des maškim-Beamten hinzu. Wenn die Gabe an besondere Respektspersonen gerichtet ist, steht deren Name an Stelle des Namens der Gottheit. Beispiel: 2 amar-maš-dù A-mi-ir ^{d}Šul-gi dumu-lugal mu-gub Da-da (23). Werden von mehreren Stiftern Tiere an ein und dieselbe Gottheit oder das é-uz-ga eingeliefert, dann ist die Reihenfolge in sofern unverändert, als der Name der Gottheit oder é-uz-ga bloss einmal, und zwar an das Ende, gesetzt wird. Ist dagegen der Stifter dieselbe Person, die zu gleicher Zeit an verschiedene Gottheiten seine Opfergabe weiht, steht dessen Name wiederum begreiflicher Weise nur einmal, und zwar am Ende der Serie. Beispiel: 1 udu-še 1 silá ^{d}Nannar 1 udu-še 1 silá ^{d}Nin-ḫar-sag 1 udu-še 1 silá ^{d}Šul-pa-è 1 udu-še 1 silá ^{d}Innina 1 silá ^{d}Nin-sún 1 silá ^{d}Lugal-bànda-da 1 silá ^{d}Nusku 1 silá ^{d}Nin-ib 1 silá ^{d}Aš-šir-gi mu-gub Zabar-ku (2). Werden bloss Teilstiftungen ein und derselben Person oder einer Gruppe von Personen erwähnt, dann steht statt mu-gub, **šà-mu-gub**. Beispiel: 1 udu 1 máš giš-gu-za ^{d}Šul-gi-ra šà mu-gub erín Maš-gán-sar-ru-um-ki (9). Wird der Stifter nicht namhaft gemacht, wird der Ausdruck **šà-mu-gub-ra-ta** gebraucht. Beispiel: 5 udu-še 1 silá ^{d}En-lil-zi-šà-gál 1 silá é-uz-ga šà mu-gub-ra-ta (33).

Bei den Stiftungen für das é-mu (šu-gíd é-mu-šù) wird nie der Stifter namhaft gemacht, wohl aber bisweilen die Beamtengruppe, in deren Interesse sie erfolgt. In unsern Texten kommen nur uku-uš und lú-kurₓ-ra vor. Beispiel: 2 gud 3 áb 96 udu 22 ganám 13 máš 32 ùz šu-gíd é-mu mu-uku-uš-e-ne-šù (21).

Etwas abweichend von diesen ba-zi-Texten, wo die Anlieferung durch die

Ausdrücke mu-gub und šu-gíd vermerkt ist, sind einige andere Urkunden abgefasst: 8; 10; 11; 13; 27; 36; 42.

Auf weitere Einzelheiten der Textanalyse wollen wir an dieser Stelle nicht eingehen, da es später andererorts in umfassenderer Art und Weise, so Gott will, geschehen wird. Die maškim-Beamten sowie jene Personen, die als anše fungieren, werden in einer eigenen Liste zusammen mit jenen aus Djoha unter den Berufsnamen zu finden sein.

2. zi-ga-Texte.

Zu dieser Gruppe gehören die Nummern 45, 46, 49-55. Sie sind deshalb weniger zahlreich als die ba-zi-Texte, weil sie aber Sammelurkunden darstellen, wozu die ba-zi-Urkunden als Einzeldokumente die Unterlage bieten. Während ba-zi eine Verbalform darstellt, etwa mit der Bedeutung „wurde weggegeben", ist zi-ga eher ein substantiviertes Partizipium: „Ausgabe". Ähnlich in etwa wie gub-ba im Verhältnis zu mu-gub. Daher auch die erweiterte Form: zi-ga-àm (45) entsprechend gub-ba-àm.

Objekt dieser Urkunden sind ebenfalls Tiere und metallene Wertgegenstände, aber auch verschiedene Getreidearten. Vielfach stellen diese Urkunden Monatsabrechnungen dar: sei es, dass die Ausgaben der einzelnen Tage ausdrücklich vermerkt sind, wie bei Nr. 49, oder dass sie direkt als Monatsausgabe bezeichnet sind: zi-ga itu še-kin-kud (50 und 51); zi-ga itu šeš-da-kú (52); zi-ga-lugal itu u_5-bil-kú (53); zi-ga itu ezen^{d}Nin-a-zu-ta itu-ezen maḫ-šù, also vom 5. bis zum 9. Monat (54); zi-ga ud-30-kam itu ezen ^{d}Šul-gi (55).

3. ni-ku-Texte.

Es kommen als solche in Betracht: 16; 48; 56-127.

1. Form. Neben den üblichen Monats- und Jahresdaten: Tiere, Verhandlungstag, verhandelnde Personen. Beispiel: 22 udu 4 silá 3 máš-gal ud-18-kam ki Ab-ba-$ša_6$-ga-ta In-ta-è-a ni-ku (56). Diese einfache Textfassung haben folgende Urkunden:

56: ki Ab-ba-$ša_6$-ga-ta In-ta-è-a ni-ku.
58: ki Ur-azag-nun-na-ta An-gu dumu Lul-a ni-ku.

Nota: Es mögen noch einige kurze zusammenfassende Bemerkungen angefügt werden. Objekt dieser Urkunden sind ausschliesslich Opfertiere. Die „Hinstellung" (ni-ku) kann auch von höhergestellten Beamten vorgenommen werden, was hauptsächlich geschieht, wenn die Einlieferung für den König oder die Königin bestimmt ist

(mugub-lugal, mu-gub-nin). Dann kann es ein Ša-še-si sein, ebenso gut wie ein sangu oder pa-al. Nie tut es der König selbst. Die Hauptperson ist auch hier, wie in den ba-zi-Urkunden Ab-ba-$ša_6$-ga. Trotzdem wird nie seine amtliche Berufsstelle erwähnt, ebensowenig wie seine Familienverhältnisse. Wessen Sohn er war, wessen Vater er selbst war, wird nirgends angedeutet. Auch sein persönliches Siegel ist bis dato noch unbekannt.

Bestimmte Tage oder Feste sind nicht für die ni-ku-Operation reserviert. Jeder Monatstag ist vertreten, keiner scheint irgendwie vor einem andern bevorzugt gewesen zu sein.

4. šu-ba-ti-Texte.

Nrr. 128-134; 149. Diese Urkunden haben ungefähr dieselbe Konstruktion wie die ni-ku-Texte. Weniger häufig in Drehem, sind sie sehr stark in den Djohatexten vertreten. Die Bedeutung des šu-ba-ti kann nicht weit von der von ni-ku abstehen und hat dazu noch viele Ähnlichkeit mit dub, wie wir das noch eigens betonen werden.

Gegenstand dieser Operation sind vorzüglich Wertgegenstände: áš und gig in Nr. 130, tote Ochsen in 131, Gefässe verschiedener Art in 132, Silber in 133, še in 134, und Sklaven in 149.

Die verhandelnden Personen sind:

128: Šu-na-mu-gi_4 šu-ba-ti.
129: Hur-gir-ni-šu šu-ba-ti.
130: ki Šu-na-mu-gi_4-ta Ur-zikum-ma šu-ba-ti.
131: ki Ab-ba-$ša_6$-ga-ta Ur-nigin-gar šu-ba-ti.
132: ki Púzur-ni-si-in-ta Anum-ba-ni šu-ba-ti.
133: anše Na-ba-$ša_6$ Lú-dingir-ra šu-ba-ti.
134: ki Ur^{d}Sn-líl-lá-ta Ur^{d}Ba-ú šu-ba-ti.
149: ki Lú^{d}Nin-šubur mu Ab-ba-$ša_6$-ga-šè Lugal-engar-e šu-ba-an-ti.

5. šà-bi-ta-Texte.

Nrr. 135-139.

Die Fassung dieser Urkunden besteht darin, dass zur Einleitung ein Hauptposten verzeichnet wird, der gewöhnlich aus einem frühern Restbestand und aus neu erfolgten Einlieferungen zusammengesetzt ist, und der dann wieder in Einzelposten aufgeteilt wird. Diese Aufteilung wird eingeleitet durch šà-bi-ta = „von seinem Innern", d. h. davon.

Nr. 135 hat einen Hauptposten von 1501 Stück Rindvieh und 167-9 Stück Kleinvieh. Die Aufteilung erfolgt in zwei neuen Posten: gub-ba-àm und kud-a sig_7-a mu-gub en Ša-eš-ki.

Nr. 136 hat als Hauptsumme 23 Stück Rindvieh, die aus vier Lieferungen entstanden ist. Davon werden 13 Stück an je eine Person herausgabt (zi-ga-àm), die restierenden 10 Stück bilden das ki-bi-gi_4-a Ur-$ša_6$-ga an 6 verschiedene Einzelper-

sonen.

In Nr. 137 besteht der Hauptposten aus 114 Stück Kleinvieh, der zum Teil aus einem Restbestand einer Rechnungsablage (si-ni-ib níg-šid-ag) des 13. Monatstages, zum andern Teil aus Neulieferungen von Privatpersonen herausgewachsen ist. Hiervon werden an 4 verschiedenen Tagen 63 Schafe an das é-mu verausgabt (zi-ga-àm), 23 weitere von Gimil-ma-ma „eingestellt" (ni-ku), 13 von Á-bil-lum-ma in Empfang genommen (dub), und die letzten 35 einzeln verausgabt (zi-ga-aš-aš).

In Nr. 138 handelt es sich um 636 Stück Kleinvieh, die von 9 Personen entgegengenommen werden, während in Nr. 139 Getreideportionen im Gesamtbetrag von beinahe 25 gur zu verschiedenen Zwecken verausgabt werden (zi-ga-àm), und noch ein kleiner Restbestand (si-ni-ib) übrigbleibt, der auf ein anderes Konto überschrieben werden wird.

6. gab-ri-dub-Texte.

Nr. 140-142.

140: 78 udu-máš ki An-zu síb-áb Ká-dingir-ki-ta gab-ri dub Ab-ba-kal-la.

141: 1 gud šu-gíd ki En-um ᵈAdad-ta gab-ri-dub Ab-ba-kal-la.

7. Verschiedene Vertragsurkunden.

Nr. 143: Eidesleistung durch Ur-ab-azag-ga: Ur-ab-azag-ga šu-i nam-ri-bi ba-kud.

145: Gerichtsverhandlung. Drei Richter sind für die Entscheidung verantwortlich: Ur-mu, Nigin-gar-ki-dùg und Lú-ama-na (di-kud-bi-me).

146 und 148 buchen kleine Gerstenrationen als Arbeitslohn.

147: Der Anfang ist zu fragmentarisch erhalten. Die Verhandlung hatte vor vier Zeugen stattgefunden.

148: Ein Sklavenverkauf. Verkaufspreis 7 1/2 gín kù-babbar.

150: In verstümmelt, so dass die Art dieses Dokumentes nicht mehr bestimmbar ist.

B. Djoḫaurkunden

Das Djoḫaarchiv ist in Bezug auf die verschiedenen Arten von Dokumenten viel reichhaltiger als das Drehemarchiv, so dass wir hier eine grössere Anzahl von Textgruppen auseinanderhalten müssen. Die meisten von ihnen sind [illegible] Sach-vort leicht charakterisierbar. Es finden sich aber auch [illegible] die nichts anderes als reine Aufzählungen [illegible] worden sind [illegible] Fi-[illegible]omissionen, die aber in den Berliner Texten nur [illegible]

vertreten sind.

In der folgenden Gruppierung begnügen wir uns mit der Angabe des Verhandlungsobjektes und der verhandelnden Personen. Weitere Einzelheiten kann man vorläufig in den nachfolgenden Wörterverzeichnissen nachsehen.
